Student Score Report—Summative Assessments

Dear Parent/Guardian:

Last spring your child took the Smarter Balanced Summative Assessments for English language arts and math. Students in grade 5 and 8, and 12 also took the California Science Test.

These tests can be combined with other measures like report card grades, classroom work, and teacher observations to give families and teachers a more complete picture of each child's learning. You can use these results to identify where your child is doing well and where they might need more support. It is important to know that summative test results are not used to determine whether a student moves to the next grade.

You can access your child's score report through the AERIES parent portal.

[How to Access the CAASPP/ELPAC Student Score Report in AERIES-Eng](#)

Your child's score report will give you information about how well they met the expectations of the grade level and where they are doing well or need more support in each subject. This is helpful information to discuss with your child's teacher to understand how they can be better supported in the classroom and how you can support learning at home.

To learn more about your child's scores, go to the Starting Smarter website at <https://www.ca.startingsmarter.org/>. There, you will find information about test results, sample test questions, free resources to support your child's learning, and a guide to prepare for parent-teacher conferences.

If you have questions or concerns, please call the school offer to arrange a conference with your child's principal.

Sincerely,

Rubén Aurelio, Superintendent
